

If we are going to stop XM from providing traffic and weather information to it's customers, then we should also stop the many radio stations across America from providing the same information as well. This information helps the listeners of XM radio and it's not harming anyone. I don't understand why it is such a concern to the NAB. These services are paid for by XM customers, they are not free. We pay for the services we receive and I don't think that the NAB, which we do not directly pay for, should have any say in what content XM Satelite Radio provides to its customers.
